Skills

Expert in content strategy, information architecture, and UX writing with proficiency in Figma for design collaboration

Experienced with AI/ML tools including Bedrock, custom AI agents, and generative AI for content creation and automation

Strong technical foundation in git, Markdown, XML, JSON, Python, and JavaScript

Skilled in agile methodologies, data-driven decision making, and leveraging product analytics to inform content and design

Profile

Results-driven Technical Writer and UX professional with 7+ years driving product quality for AI-powered developer tools at AWS and Microsoft. Expert in content strategy, information architecture, and cross-functional collaboration with engineering, product management, and support teams. Successfully led documentation for multiple product launches, managed teams of 6+ writers, and leveraged AI/ML tools to organize 1,500+ customer tickets and create innovative solutions that deliver immediate value to technical users.

Employment History

Senior UX Writer, Amazon Web Services

JUL 2025 – PRESENT

- Created comprehensive copy guidance for Quick Suite product launch in October 2025, establishing consistent voice, tone, and terminology across the platform based on user and leadership survey results
- Participated in 50+ Fit and Finish reviews, providing UX design and copy feedback to enhance product clarity, consistency, and reduce cognitive load for users
- Designed and deployed "UX Copy Writing Assistant" custom AI agent, enabling designers and product teams to generate publish-ready copy in seconds from design screenshots
- Initiated new AI-powered feature design that proactively proposes personalized suggestions based on user data, peer behavior patterns, and product usage analytics

Senior Technical Writer, Amazon Web Services

JUL 2023 – JUL 2025

- Led team of 6 writers creating documentation for Quick Suite, developing working-backwards roadmap and architecting seamless transition plan that ensured successful launch
- Leveraged Bedrock to organize and prioritize 1,500+ QuickSight customer tickets, cleaning up repositories and documentation backlogs before transforming content into Quick Suite documentation
- Orchestrated documentation for 10+ CodeCatalyst feature launches at AWS re:Invent and presented implementation guidance to 150+ technical writers, driving organization-wide adoption
- Served as sole technical writer for App Studio, architecting comprehensive documentation for highly complex, AI-assisted application creation platform and partnering with PM and engineering teams to deliver impactful product suggestions and UX designs in Figma

Senior Documentation Manager, Amazon Web Services

MAY 2022 – JUL 2023

- Managed team of 6 technical writers supporting CodeCatalyst documentation as hybrid manager, successfully promoting 2 writers and performance-managing 1 writer
- Led agile development processes, facilitating sprint planning, retrospectives, and priority planning to align content delivery with product milestones
- Pioneered level of effort tracking initiative for the organization, implementing work estimation processes that served as model for broader adoption
- Drove documentation strategy and execution for CodeCatalyst GA release in April 2023, ensuring comprehensive coverage while meeting launch deadlines

Senior Technical Writer, Amazon Web Services

OCT 2021 – MAY 2022

- Established documentation patterns and content architecture for CodeCatalyst prior to December 2022 public preview, creating foundational standards for new integrated DevOps service
- Organized and executed documentation roadmap, coordinating cross-functional deliverables and prioritizing content development to support product launch milestones
- Created end-to-end documentation for CodeCatalyst Artifacts and Issues features, translating complex concepts into accessible user guides and API references
- Mentored 3 junior technical writers, providing guidance on documentation best practices, content strategy, and technical writing standards

Technical Writer, Amazon Web Services

NOV 2019 – SEPT 2021

- Developed and maintained technical documentation for Developer Tools (CodeArtifact and CodeDeploy), including 50+ API operations and 700 user guide topics
- Advocated for customers during product design discussions, UX reviews, and blog planning, resolving customer tickets to prioritize documentation improvements

Program Manager II, Microsoft

FEB 2019 – JUL 2019

- Reviewed product and feature usage analytics to determine efficacy and discover improvement areas, prioritizing development backlog for 15+ developers
- Conducted 10 rounds of customer outreach to gather feedback and created 5 feature specifications including detailed problems, usage scenarios, solutions, and projected impact

Content Developer II, Microsoft

MAY 2016 – FEB 2019

- Maintained 100+ articles across REST API, extensibility, and Azure Artifacts for Azure DevOps, collaborating with PM and development teams to document new features
- Provided effective content roadmaps using documentation analytics and reported monthly performance reports to content and product leadership teams

Software Engineer, IBM

JUL 2014 – MAY 2016

- Designed and developed unit tests for WebSphere Application Server's intelligent management and dynamic routing functionality
- Worked with Eclipse RTC and Git source control while developing Java code in an agile environment

Education

Bachelor of Science in Computer Science, University of North Carolina at Chapel Hill, Chapel Hill

2014
