Amazon Web Services

May 2022 – July 2023, Remote

Senior Technical Writer

Amazon Web Services

October 2021 – May 2022, Remote

Technical Writer

Amazon Web Services

November 2019 – September 2021, Remote

- Develop and maintain technical documentation for Developer Tools (CodeArtifact and CodeDeploy) in AWS, including over 50 API operations and data types, and 700 user guide topics.
- Advocate for our customers and their experience during product design discussions, UX reviews, and blog planning and posting.

Program Manager II

Microsoft

February 2019 – July 2019, Raleigh, NC

- Closely reviewed product and feature usage analytics to determine efficacy and discover potential improvement areas.
- Prioritized and maintained a development backlog for 15+ developers.
- Conducted ~10 rounds of customer outreach to gather feedback for both existing and future features.
- Created ~5 feature specifications including detailed problems, usage scenarios, solutions, and projected impact for product improvements.
- Collaborated with the development team to implement product enhancements and expand feature coverage.

Content Developer II

Microsoft

May 2016 – February 2019, Raleigh, NC

- Maintained over 100 articles across REST API, extensibility, and Azure Artifacts for Azure DevOps.
- Collaborated closely with PM and development teams to promptly document new features and product changes.
- Considered documentation analytics and statistics to provide effective content roadmaps.
- Created SEO plans and conducted SEO training seminars for other content teams.
- Reported monthly content performance reports to content and product leadership teams.

Software Engineer

IBM

July 2014 – May 2016, Raleigh, NC

- Designed and developed unit tests for WebSphere Application Server.
- Worked with Eclipse RTC and Git source control and continuous build management.
- Developed code in an agile environment.
- Delivered support and education presentations to WebSphere Application Server users.
- Helped develop a command-line utility to help automate internal Jenkins builds.
